

Gluing, case-making and labelling line

Automatic lining machine (cold vinylic glue and/or warm glue)
High production equipment, no matrixes (clichés) need, no-stop paper loading from the top.

Technical features

Material:

- outside coated board
- paper
- laminated paper
- polypropylene or similar

Cardboard thickness: 1 mm to 4 mm

Lining material thickness:
80 up to 130 gr/sqm

Capacity: up to 50 cycles/min.

Electrical power req.: 3,5 Kw

Compressed air:
150NL/min. (pressure 7 bar)

Overall dimensions:
L=3500mm W=2700mm H=2000mm
